

Organix IT worldwide names new VP sales & architecture for Canada and China

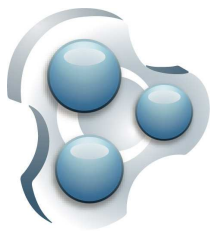

March 7th, 2007, Organix IT Canada has named Jacques Albert as its Vice-President Sales and Architecture for Canada and China. Mr. Albert is also assuming responsibility for the IBM worldwide relationship. Mr. Albert's appointment will be effective on April 2th, 2007.

Prior to joining Organix IT, he spent 15 years with IBM Canada Ltd. in various roles such as Business Development Manager for Systems Storage, eServer Sales Manager for a large Canadian financial services company, Network Systems Sales Specialist and working in the Intelligent Building Group services practices within IBM Canada.

Mr. Albert holds a Bachelor degree in Computer Science from the University of New Brunswick.

According to analyst, Organix IT, the #1 security and digital media company in the world is attracting more and more key decision makers.

“Having Mr. Albert as our VP sales/architect for Canadian and Chinese operations is already creating business opportunity within the two countries”, said Babak Pirmoradi, CEO.

Organix IT Inc. is the intelligence behind video surveillance systems. Their S-VMS system, unique in the world, allows for advance functionality such as: face, behavior and license plate recognition, as well as marine traffic control and surveillance. Organix also offers dynamic digital signage and media solutions. Internationally, Organix IT supports critical customer environments by implementing completely automated IT infrastructures. These solutions are also self-managing in a control center that ensures the continuity of clients operations. Visit : www.organixIT.com
